

CPR Community Support Billing Cap

Email notification from Tom Rehak July 19, 2010:

This is to inform you that the monthly billing cap at MO HealthNet on CPR Community Support (H0036) has been raised to 50 hours per month per client (200 units). This cap will also be set in CIMOR for non-Medicaid claims.

As you recall we initially requested MHD raise the cap from 24 hours/month to 36 hours/month in response to the January 2010 changes in the definition of a billable unit of service. We subsequently amended our request to have the cap further increased to 50 hours per month to allow for more intensive community support services to be available to persons affected by inpatient redesign and the closure of inpatient beds and ER's in certain areas of the state.

Q: Several people have asked what the effective date of this is.

A: It is effective immediately, and is not service date specific. If you had any claims above 24 hours/mo that had previously rejected or that you were holding, you can submit them now and they will pay up to the new cap.
